DES 550B

GUARANTEE

You have just acquired a quality product, and the objective of the following text is to provide you with information on the conditions of guarantee and the useful life of your shower unit.

- ✓ **There is a two-year guarantee on your shower unit** (as from the date of purchase: your invoice provides proof)
- ✓ The nominal guarantee is that of the general conditions of sale.

Reminder of the conditions of guarantee and exclusions

CONDITIONS. The installation must be in compliance with standards and with good professional practice. This installation must comply with the following obligations:

- A supply of hot water at a constant temperature of between 55°C and 65°C is preferable (hot water tank, immersion heater, etc.).
- The pressure in the hot and cold water supplies must be between a minimum of 3 bars and a maximum of 5 bars. A pressure differential of one bar between the hot and cold water supplies can lead to incorrect operation.
- On manufacture, your thermostatically controlled mixer tap is set to 38°C. If a temperature difference occurs, calibrate the cartridge (See instructions for use, page 14)
- When installing new copper pipes, bleed them before connecting them up definitively to the taps (Any remaining impurities could block the filters or the mixer tap).

EXCLUSIONS. The following are excluded from the guarantee:

- Poor conditions of installation of the shower unit: floor not level, electrical installation not in conformity with standards, failure to comply with assembly instructions.
- Poor functioning of the taps: insufficient or excess mains water pressure, water heater insufficient.
- Breakage of glass though a physical gesture or other circumstances such as external vibrations, etc.
- A product that has obviously been modified.

TECHNICAL SUPPORT – REPAIRS

The maximum temperature is too low as compared with the temperature of the hot water supply.

- Check that the filters are clean, and clean them if necessary.

The water flow rate drops over time.

- Clean or replace the filters on the mixer tap.

The water is not at the right temperature.

- Check that pressure levels of the hot and cold water supplies are similar.
- Check that the supply hoses are not pinched.

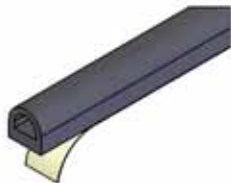

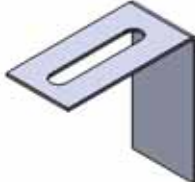

When the unit is put into service, the water is either always hot or always cold.

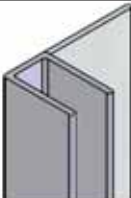

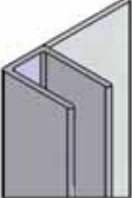

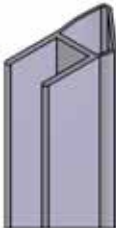

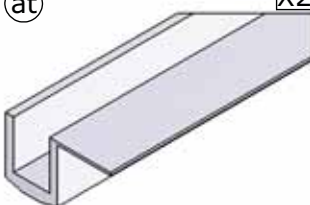

- The inlet pipes have been connected up the wrong way round.

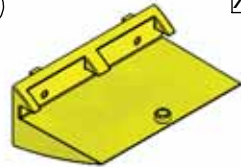

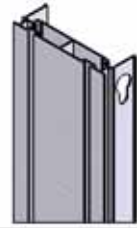

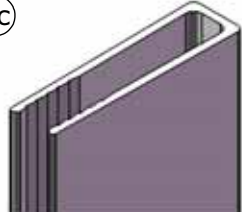

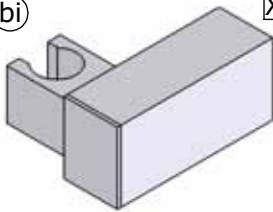

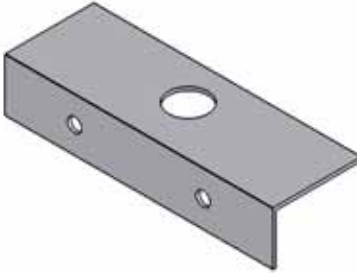

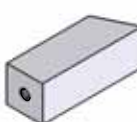

The mixed water flows in spurts and at low flow rates except at extreme temperatures.

- One of the water supplies is insufficient.
- The filters are clogged.

Les quantités données sont les quantités utiles au montage.
Les sachets fournis contiennent des pièces supplémentaires.

The quantities given are what are required for the installation.
There may be some surplus parts in the package provided.

Las cantidades indicadas son las cantidades necesarias para el montaje.
Las bolsitas incluidas contienen piezas suplementarias.

De aangegeven hoeveelheid toont het aantal onderdelen dat voor montage nodig is.
De meegeleverde zakjes kunnen meer onderdelen bevatten.

MONTAJE A LA DERECHA
MONTAGE RECHTS

MONTAGE A GAUCHE
LEFT HAND
MONTAJE A LA IZQUIERDA
MONTAGE LINKS

Vous avez la possibilité de réaliser un montage à droite ou un montage à gauche. Notre notice d'installation décrit un montage à droite. si vous voulez réaliser un montage à gauche, il vous suffit d'inverser le montage.

This cubicle can be installed either left or right hand. These installation instruction show a right hand installation.

Puede realizar un montaje a la derecha o un montaje a la izquierda. Nuestro folleto de instalación describe un montaje a la derecha. Si desea montar su cabina a la izquierda sólo tendrá que realizar el montaje al contrario.

U kunt de cabine rechts of links monteren. Onze handleiding beschrijft de rechtse montage van de cabine. Keer de montage om als u de cabine links wilt monteren.
